EDUCATION

Inspir, São Paulo: Bachelor's Degree in Economics July 2017 - Dec. 2021

Courses: Social Policy, Public Policy, International Macroeconomic, Advanced Topics in Fixed Income Assets

Advisor: Naércio Aquino Menezes Filho

Thesis: The Impact of Poverty on Mortality During the First Wave of the Pandemic

University of California, Berkeley: Visiting Undergraduate Student.

Spring Semester 2020

Courses: Economic Development, Public Economics, Wage Theory, and Public Policy

University of São Paulo, São Paulo: Master's Degree in Economics

Jan. 2024 – Dec. 2025

Courses: Microeconomic Development, Microeconometrics, Labor Economics, Behavioral Economics, Political Economy, Public Policy, Economic History, Open Macroeconomics and Causal Inference.

Advisors: Solange Ledi Gonçalves and Valdemar Pinho Neto

Thesis: [Who Benefits from Benefits?](#)

RESEARCH & ANALYTICAL EXPERIENCE

Academics

Research Interests: political economy, public policy, labor markets, education and development economics.

Co-Author

Project: Democracy for Sale: Media Concessions and the Persistence of Political Power

Working with: Alexsandro Cavgias and Luís Meloni

Associations: University of São Paulo (USP) and Ghent University

- Built and cleaned the core dataset linking TSE electoral returns to CNE media concessions, creating an identification-ready panel for quasi-experimental analysis.
- Designed the validation and robustness suite, documenting how politically allocated media access strengthened incumbency and legislative alignment.
- Led heterogeneity analysis using interaction models and subgroup event studies, interacting treatment with municipality-level radio counts (proxy for local media concentration) to pinpoint where effects are strongest and by how much.

Project: Can CCTs Promote Local Entrepreneurship? Evidence from Brazil's Bolsa Família Expansion

Working with: Augusto Souza and Guilherme Figueira

Associations: Fundação Getúlio Vargas (EESP)

- Identify a conservative lower-bound effect of the Bolsa Família expansion on local entrepreneurship using CadÚnico administrative data, with sample restrictions and bias-minimizing estimators.
- Design the empirical strategy and model leveraging expansion timing and eligibility rules; implement panel FE/event-study specifications and a robustness suite (placebos, alternative codings).
- Estimate heterogeneous supply-side responses across municipalities (e.g., credit access, pre-existing firm density, informality) to map where effects are stronger and why.

Research Assistant

Project: Promises, Policies and Accountability

November 2025 - ongoing

Principal Investigators: Caroline Le Pennec-Caldichoury and Cláudio Ferraz

Associations: HEC Montreal and University of British Columbia (UBC) / PUC Rio

- Responsible for the Education section: built promise-to-delivery indicators (scope, targets, timelines) and a “promise → policy → implementation” database using mayoral proposals from 2012 to 2020.
- Contributed to the analysis of the relationship between campaign promises, realized policies, and accountability (reelection, oversight), with heterogeneity analysis and robustness checks.

Project: Television Rules the Nation: Can Entertainment Media Undermine Dictatorships? **August 2025 - Feb. 2026**

Principal Investigators: Cláudio Ferraz and Luís Meloni

Associations: University of British Columbia (UBC) / PUC Rio and University of São Paulo

- Responsible for media (TV Globo and O Globo) and electoral data analysis; build a municipality-year dataset and estimate the effect of Rede Globo's rollout on ARENA vote share.
- Responsible for estimation of staggered DiD estimators (Callaway–Sant'Anna; Roth–Sant'Anna), justify estimator choice on efficiency/assumptions, and run event-study and robustness checks.
- Responsible for heterogeneous effects by telenovela content, coding themes and interacting exposure with content indices (e.g., political salience, modern-values) to test differential impacts on outcomes.

Project: Belief Frictions and the Allocation of Effort to Soft Skills Development

March 2025 - Dec. 2025

Principal Investigators: Emily Beam, Laia Navarro-Sola, Ricardo Dahis and Ursula Mello

Associations: Abdul Latif Jameel Poverty Action Lab (J-PAL) at Insper.

- Contribute to the design and implementation of the information treatment and survey instrumentation (content, framing, delivery, measurement), with iterative feedback from pilots.
- Develop the heterogeneity analysis plan for labor-market impacts using RAIS, and synthesize literature on soft skills and information interventions to inform the pre-analysis plan and variable construction.
- Link SENAI administrative student records to RAIS to analyze post-training outcomes (employment, wages, mobility), with heterogeneity by gender, age, course, and tenure (R/Stata).

Teaching Assistant

Course: Introduction to Microeconomics (Graduate)

Spring Semester 2024

Instructor: Thomas Conti

Association: Insper

- Co-developed course assessments: problem sets, midterms/finals, and grading rubrics.
- Led tutoring/office-hour sessions and resolved coursework questions for graduate students.
- Provided individualized feedback and review materials to strengthen micro theory applications.

Finance

Research Interests: international macroeconomics, labor markets, inflation dynamics and monetary policy.

Brazil Warrant Gestão de Investimentos: Moreira Salles Family Office.

Worked under: Marcelo Salomon and Samer Shousha

Dec. 2020 - Dec. 2023

Economic Research Economist:

- Responsible for inflation projection of government-set prices in Brazil and for inflation analysis across key emerging markets like Mexico, Chile and Colombia.
- Assisted in monetary policy forecast meetings and strategy discussions with senior economists.
- Responsible for tracking policy developments through meetings with government officials.

Economic Research Intern:

- Assisted in producing forecasts for inflation, exchange rates, and monetary policy, supporting senior economists with data preparation and analysis.
- Developed automated routines for data cleaning and API-based collection to streamline internal reporting workflows.
- Responsible for collecting, processing, and analyzing global COVID-19 datasets, including cases, deaths, and economic indicators across countries.

HONORS AND AWARDS

Academics

Winner of the Advanced Macroeconomics Research Project (Undergraduate):

Fall Semester 2020

- Analyzed country-level data over time, comparing the ones that use optional voting and compulsory voting system to analyze the effect of economic cycles in electoral participation.

Publication of articles at the Brazilian Institute of Economics:

Fall Semester 2020

- Analysis to understand the different impacts of the pandemic on excess death, comparing municipalities with different levels of GDP per capita.
- Link: [Excesso de mortes é maior em microrregiões mais pobres.](#)
- Link: [Os impactos distributivos da pandemia e o papel da infraestrutura hospitalar.](#)

Winner of the Advanced Microeconomics Research Project (Undergraduate):

Fall Semester 2019

- Conducted a DiD analysis using county-level data comparing republicans and democrats' counties in the border states and the possible effects of Trump's speeches on police murders against Latinos.

Finance

Second place of the Central Bank of Brazil's Top5 Government-set Prices Inflation Forecast Ranking:

Dec. 2022

- Responsible for one of the most accurate inflation forecasts for government-regulated prices nationwide.
- Link: [Focus - Annual Top5](#)

SKILLS

Data Collection and Analysis

Intermediate proficiency in Microsoft Office, Google Suite, LaTeX and [GitHub](#).

Advanced proficiency in Stata, R, Python and EViews.

Languages: fluency in Portuguese (mother tongue), Advanced English (TOEFL 100).
